Environmental Test Laboratory - Capabilities

Introduction:

This document describes the capabilities of Alphatech's Environmental Test Laboratory.

Alphatech was established in 1997 and has an excellent reputation for the sales, service and repair of both new and used environmental test equipment.

During April of 2002, Alphatech moved into purpose built premises that included an area assigned for an Environmental Test Laboratory.

This was a long-term growth plan for Alphatech, one of the objectives being to provide a 'Best in Class' Environmental Test Laboratory to meet and support our Customer's ongoing test requirements.

In February of 2003, Alphatech was assessed and certified as meeting the requirements of ISO 9001:2000. In July of 2004, Alphatech was granted UKAS Test Laboratory Accreditation to ISO/IEC 17025.

A further extension to our Scope of Accreditation was granted by UKAS in April of 2006 to add Salt Spray, additional Mechanical Shock Test facilities and a 'Walk In' Climatic Chamber to our capabilities.

In October of 2007, as the result of our planned capability improvements and continuous improvement philosophy, Alphatech moved into larger premises and we have further extended our Scope of Accreditation to meet the increasing requirements of our customers.

Copies of our ISO 9001:2015 and ISO/IEC 17025: 2017 accreditation certificates are attached for your information.

Included in this document are details of the capabilities of our Environmental Test Laboratory.
